

Developing the world's highest grade resource of **GRAPHITE**

www.talgaresources.com

Talga Resources Ltd
1st Floor, 2 Richardson St
West Perth WA 6005 Australia

100% owned high-quality graphite in a world class mining province - **Sweden**

- Pro-mining and low sovereign risk
- Low tax and power costs
- High quality infrastructure - roads, rail and ports
- Close to markets

Why Invest?

Grade is King - Highest grade JORC or NI 43-101 Graphite resource in the world (Nunasvaara). Capable of 20+ year open-cut mine life.

Path to Production - Advanced development status with scoping studies commencing early 2013. MoU signed with Port for export of graphite concentrate.

Growing demand - Graphite applications growing in new markets for Lithium ion batteries and graphene. Demand from 'historical' markets is not abating against a backdrop of material declines in Chinese production.

Location - Proximal to existing bulk commodity transport infrastructure, low-cost power supply and European markets.

Diversified Assets - Multiple graphite deposits catering for ultra-fine to coarse flake demand. Additional product streams to commercialise in iron, copper and gold.

GRAPHITE

Nunasvaara Mineral Resource 7.6Mt @ 24.4% Cg
(JORC Indicated & Inferred, amorphous and flake)

Raitajärvi Mineral Resource 0.5Mt @ 10.8% Cg (JORC Inferred, expansion drilling underway)

JORC exploration target (0-100m depth) total 117-178Mt @ 17-23% Cg

OTHER ASSETS

Sweden Iron Mineral Resource 87.1Mt @ 29.9% Fe_{mag} (JORC Indicated & Inferred) with additional iron JORC exploration targets (0-100m depth) total 61-145Mt @ 29-37% Fe_{mag}

Australia high-grade gold projects in Yilgarn and Pilbara mining districts

24.4% Cg
